

- a 5 day all-inclusive preparation course for the **CSSGB<sup>®</sup>** exam

## ASQ Six Sigma Green Belt Certification

This interactive course addresses individuals interested in applying the Six Sigma methodology when working in teams. It is designed to lead participants through the topics of the CSSGB<sup>®</sup> Certification exam. The course duration of 5 days is split into 2 sessions over one month.

### Objective

- To provide the best basis for all Six Sigma practitioners to successfully participate in and partially lead Six Sigma projects
- To prepare participants to take and pass the ASQ SSGB<sup>®</sup> Certification Exam for **GREEN BELTS**.

### Content

As well as a high level study of the DMAIC Methodology, the course also covers the areas of Process Analysis, Project Management, and Common Lean tools. It guides you through the common Six Sigma Tools. An introduction to the basic statistical knowledge applied for Six Sigma is included.

### Method

This course uses a blended learning approach: a well-balanced mix of classroom training and self-study using practical examples and case studies.

The facilitators employ their broad and long experience to give you all the hints and tips you will need to be sure to pass the exam!

### Dates and Price

The fee for this course is 3'200 Euros
