

– a 4 day preparation course for the PMP® exam

PMI Certification

This 4-day interactive course is intended for experienced Project Managers (min. 4'500 hours (equivalent of 2.5 years) experience in leading and directing specific tasks and 36 months (3 years) project management experience in the last 8 years) who wish to gain the **PMI Project Management Professional (PMP®) Certification**. The 4 days are split into two sessions of 2 days over 3-4 weeks.

Objective of the course

The course has one main objective:

To prepare participants to take and pass the PMP® Certification Exam.

Our facilitators have trained over 1'600 Project Managers in the last 5 years, with an impressive record of a pass rate in excess of 95%.

The course is based on the NEW PMBOK® GUIDE VERSION 4.

Content

The areas covered are all five Process Groups (Initiate, Plan, Execute, Control and Close) as well as the nine Knowledge Areas (Communication, Time, Cost, Scope, Integration, Human Resources, Risk, Quality, Procurement) and Professional Responsibility.

Contrary to most courses, proPM-P© approaches the information by Process Group – a more logical and useful approach for the Project Manager.

The course content is based upon the PM Book of Knowledge Guide – FOURTH Edition (PMBOK® - the official PMI guide to Project Management, and the basis for all Certification questions), and also includes all supplementary information needed to pass the exam.

Method

This course uses a blended learning approach: a well-balanced mix of classroom training and self-study using probably one of the best web-based tools for the exam preparation.

The facilitators have a broad experience as Project Managers of large Projects – their goal is to give you all the hints and tips you will need to be sure to pass the exam!

Date and Price The fee for this course is 2'470 Euros (plus VAT for companies).
